MAGNOLIA GRANDIFLORA
The South's Grandest Tree

ILEX OPACA

AMERICAN HOLLY

We solicit your business without any qualifications, for we are equipped to handle any volume that comes our way. Our stock is plentiful, and what's more it is in top condition, ready to take hold immediately after being transplanted. Our trucks and workers are adequate and we are ready to give you excellent service.

And what exactly are the "specialties of the house"? We would call your attention to our good collection of azaleas, fruit trees, camellias, grafted gardenias, buginvillaea, podocarpus and ixora. You will go a long way to find a fuller and better list of spectacular old-fashioned and new hibiscus. We have made an exhaustive study of hibiscus as it is growing in our part of the country, checking old descriptions with actual blooming plants, and we are pretty proud of what we now offer. Primarily we cater to the trade of Central Florida, especially the area around Tampa, but we also have some items not listed that are more at home farther south. Don't be afraid to ask us about items not listed here.

Now, better than any catalog reading you may do, will be a personal trip to our nurseries. There is nothing like the sight of a gorgeous camellia or hibiscus in bloom to make you realize just what a similar plant could do for your own garden. And please don't get the idea that we are super-salesmen who will compel you to buy when you are "just looking around." We will be very happy to have you do just that; if you want to ask us about any particular plant, we shall be glad to serve you but otherwise we shall let you roam around at will without interference.

Please note that our nurseries are open to visitors the year round, but our business hours on week-days are from 8 a.m. to 5 p.m. (Saturday, 8 a.m. to noon), except by special appointment (Phone 332261). From mid-October to mid-May we are also open on Sunday from 10 a.m. to 6 p.m., but we are closed on Sunday all summer. Telephone calls are to be made at these same hours, except that we never answer the phone on Sunday.

Our Big Annual Sale Begins October 15 and Continues Until May 15

Large-leaved Brassia actinophylla in the left foreground, with iris-like Morea at the right, and Clerodendrum fallax. The hedge in the background is Podocarpus, with a specimen of Camellia, Debutante back of the cross-the control of the control o large Live Oak tree, just planted, stands in the center background.

Garden Furniture

In addition to all the splendid plant material offered especially adapted to the needs of home owners in Central Florida, we carry a wonderful line of Garden Furniture. We use the term in the widest sense, and the only way we can tell you about it is to list some of the items that we stock and then invite and urge you to come to

our nurseries and see it for yourself.

Garden furniture is to the garden exactly what livingroom furniture is to a living-room. It is necessary to use the same forethought in choosing it and the same good taste in placing it. Really good pieces well arranged can do a great deal to make your garden a place of deep enjoyment for the whole family. Here you can find relaxa-tion and recreation and can capture again that sense of gracious living that seems to be slipping away from us.

Here are just a few of the items we carry in stock: Settees to fit around trees

Benches to place at the end of a vista

Chairs and tables for grouping

Huge marble-top tables for outdoor dining

Smaller tables for snacks

Hitching posts

Pedestal urns for plants

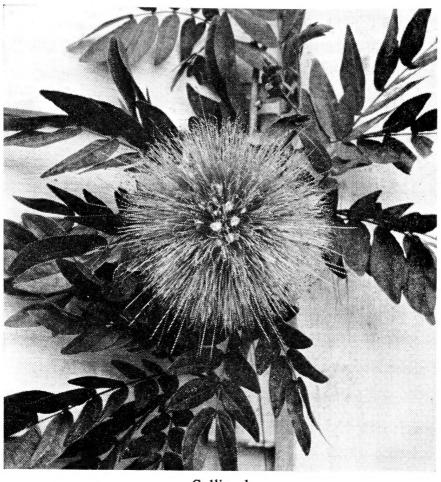

Foot scrapers and other ornamental iron pieces

We also stock and sell cast-iron balcony railings, gates, gateways, old brick for walls, patios, pillars, old patio tables with marble, glass and tile tops, and too many other similar furnishings to list. Some are garning antiques similar furnishings to list. Some are genuine antiques, others are reproductions, others are custom made to order.

We cordially invite your inspection of these garden furnishings. We cannot take telephone or written orders.

A patio garden made livable with cast-iron garden furniture. The tree with the crooked trunk is *Ilex rotunda*, with Pentas in flower and a Podocarpus hedge back of it. At the corner of the office building is a large Avocado tree; under it are Calla Lilies and Clerodendrum fallex.

Calliandra

New and Unusual Plants Azalea

MACRANTHA. Small glossy leaves. Compact growers blooming over a long period. Excellent landscape plants. For complete description and prices see page 7.

Calliandra haematocephala

New. Rare and scarce. A large tropical to semitropical shrub which can also be pruned and shaped into a small tree or medium-sized bush. Somewhat hardier than Hibiscus. This is an easily grown evergreen that blooms freely in the sun or half shade. It produces showy masses of gorgeous mimosa or brush-like red flowers over a long period in the winter season. We also have other varieties, but none so beautiful as this elegant red type. We can offer large plants, full of vim and vigor. Cutting-grown plants, in 4-in. pots, small, \$1.00 each; in 5-in. pots, heavier, \$2.00 each. Extra-strong, in 1-gal. cans, \$2.50 and \$3.00. Heavy specimens in 4-gal. cans, \$5.00 and \$6.00. 6-gal. cans, \$7.50 to \$10.00.

Ruby Grapefruit

U. S. Plant Pat. 53. A seedless, early variety that is excellent for home planting. The fruit is ready to eat in November but the deepest color appears in late February and fades slightly thereafter. The fruit holds until June and is shaped somewhat like Marsh Seedless. A very prolific grower, bearing young. A non-propagating agreement must be signed with the purchase of each tree. Extra choice, strong trees buckhorned back on budded Sour Orange understock, \$7.50 each. B&B, \$10.00 up each.

Buginvillaeas are easy to grow. A well-drained, sunny location suits them best. Be careful not to use too much fertilizer, for that makes them grow too fast and then they fail to bloom well.

Grafted Gardenias

Romance, beauty and wonderful fragrance are combined in these lovely blooms. Here is an evergreen shrub that grows to perfection in our locality, and we have made a specialty of it. We have experimented with many varieties and offer the most desirable kinds, all grafted on Gardenia thunbergi. Grafting overcomes the root-knot to which Gardenias on their own roots are subject. A good grafted Gardenia plant will live for years, increasing in size and beauty as it gets older. Rich soil with good drainage is needed; like many other plants, Gardenias like moisture but not "wet feet." Several feedings and proper spraying will produce a shrub beautiful even when out of flower. Grafted plants will bloom over a period of several months.

In our nursery we have one of the largest specimens of Grafted Gardenias in the State of Florida. It is over 9 feet high, with a spread of 8 feet and a trunk caliper of over 4 inches. Every year it produces literally thousands of blooms. Come to see our magnificent collection of Grafted Gardenias and make your own selection.

- GLAZERI. A new cross between Gardenia grandiflora and G. thunbergi. Large flowers, somewhat like McLellan No. 23. A strong grower. Grafted plants in gal. cans, \$3.50 each. In nail kegs, \$5.00 to \$7.50 each.
- McLELLAN NO. 23. A very popular variety with beautiful foliage. Flowers are large and flat, opening like a rose. An excellent grower. We consider it the best large-flowering variety.
- VEITCHI. By far the most popular of all. Small to medium-sized flowers of perfect formation. Low and spreading in growth; small leaves. Blooms over a long period, especially when grafted, and responds to good care. Requires lots of water and regular fertilizing to keep it happy.
- HYBRIDS, MIXED SEEDLINGS. We secured these direct from the originator. We have several variations which are extra strong, compact growers, producing large, flat, beautifully shaped blooms. Much stronger and faster in growth than Veitchi. We were very much impressed with the flowers. Small plants from cuttings, \$1.00 and \$1.50 each. Strong grafted plants in gal. cans, \$3.50 each.
- NEW. We have a few plants all of the same unnamed variety. Wild claims have been made for it; however, since our plants were small, we don't yet know what it will do. Our original plants have formed buds and should bloom well this season. A rare specialty for collectors. Small plants from cuttings, \$1.00 and \$1.50 each. Strong grafted plants in gal. cans, \$3.50 each. See page 38 for other standard varieties of Gardenias.

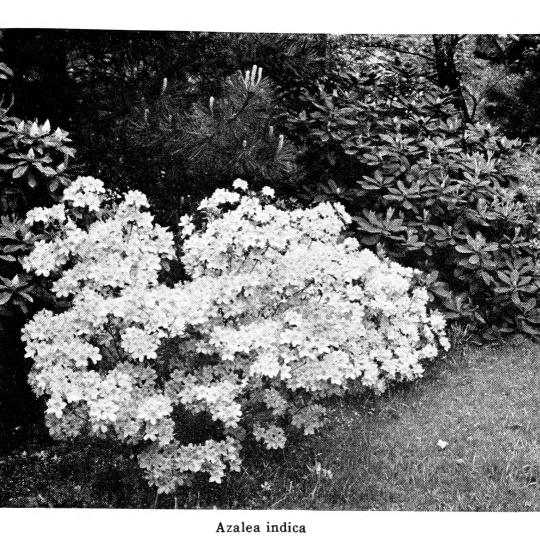

Heavily Budded and in Bloom (in Season)

Gal. cans
5-qt. cans 4.00 and 4.50
In nail kegs, specimens \$6.00, \$7.50, \$10.00
Large balled specimens \$12.50 to \$25.00 and up

See page 38 for own-root varieties and prices.

ATTENTION, COLLECTORS!

We have other varieties not listed here, at slightly higher prices.

AZALEAS

Riotous bloom and color

Azaleas are so much at home here that no garden is complete without some of these beloved southern flowers. After testing all sorts, we have found the Indica varieties to be best suited to all our growing conditions. Indica and Macrantha sorts are the ones we recommend. The proper soil and plenty of moisture with some shade makes the growing of Azaleas a real pleasure. WATCH FOR OUR AZALEA SALE—A BIG EVENT.

While Azaleas are usually planted between the months of October and May, if carefully handled they may be set out in any month of the year. They do not grow successfully in sand, but thrive in rich peat. Yearly applications of leaf-mold and cottonseed meal will keep the soil in acid condition and the plants thriving. A good plan is to scatter oak leaves among your Azaleas; as they decay they provide plant food of an acid nature.

We are proud of the fact that we were the introducers of Azaleas to Central Florida as a plant for general landscape use. For years they have been one of our specialties and have contributed a great deal to the success of our business. No finer plants than ours can be secured anywhere; we have every size from the smallest to large old specimens. Every one we offer is a genuine beauty.

Home-owners look forward to our annual Azalea sale held in November, December, January and February. Many of the choicest Azalea plantings in this area have been executed by our firm, and we point to them with pride as examples of our quality of work. We locate and lay out the beds, select the varieties, excavate,

prepare the soil, and set out the plants. This is all just part of the day's work to us, and we are up to the minute in all our methods.

Those who prefer to do their own planting are welcome to consult us on any special questions that may arise. In such a case it is preferable for the buyer to visit our nurseries and select the plants in person while they are in bloom. In this way the exact specimen for each location may be had. We can supply the proper soil, composted peat, for planting Azaleas.

AZALEA INDICA

- BRILLIANT. Early midseason. Clear deep rose-pink. Compact, slow growth.
- UC DE ROHAN. Early. Light salmon-orange, medium size. Blooms abundantly over a very long period. Pruning keeps the plant low and bushy. Fine for landscape planting. DUC DE ROHAN.
- ELEGANS. Early. Clear light pink. Hardy, rapid grower.
- FIELDER'S WHITE. Early. Large, pure white flowers. Hardy, strong, upright. The best white.

 FISHERS PINK. Midseason. Light pink. Strong, compact bushy grower. New.
- FORMOSA. Midseason. Very large, lilac-lavender flowers. Robust growth. The finest of its color and the most popular Robust growth. The finest of of all Azaleas. Grows easily.
- **GEORGE FRANC.** Early. Large, clear light pink. One of the earliest to bloom. Free flowering, hardy, compact.
- GULF PRIDE. Light purple, sometimes variegated. Strong, upright grower. Free bloomer, flowering over several months. Foliage is not too good, however. Flowers reward you by prolonging the season. Sizes limited.
- LAWSAL. Midseason. Soft salmon-orange. Blooms profusely over a long period and is in great demand. Easy to grow.
- MAGNIFICA. Similar to Gulf Pride except that flowers are variegated white with lavender. Our strain has white predominating. We consider it very worthwhile. Only a few plants in limited sizes.
- MRS. ENKE. Variegated. Dwarf, slow, compact grower. Very pretty; helps to break up solid colors when used in group plantings. We like it and recommend it. Sizes limited.
- PRESIDENT CLAY. Early. Medium-sized flowers of clear orange-red. Tall, open growth; free flowering.
- PRIDE OF MOBILE. Midseason. Similar to Elegans but more compact in growth and bearing larger flowers of water-melon-pink. Very free flowering.
- PRINCE OF ORANGE. Midseason. Large, clear orange flowers well mixed through the luxuriant foliage. Free flowering and compact in growth.
- PRINCE OF WALES. Late. Clear deep pink. Hardy, slow, compact grower and a very free bloomer. Beautiful flowers.
- SWEETHEART SUPREME. A new hybrid, like a Sweetheart rose in shape and color. Small pink hose-in-hose flowers, freely produced.
- VITTATA FORTUNEI. Early. Lavender flowers variegated at times with white. Hardy, tall, very free blooming. Has been known to remain in bloom from September to February.

Choice Strong Bushy Plants	Each	10			
6 to 10 in	\$0 50	\$4 00			
8 to 12 in		6 50			
12 to 15 in	00	9 00			
15 to 18 in					
18 to 24 in					
2 to 3 ft		0 0 0			
3 to 4 ft	5 00	45 00			

At these same prices but in limited quantities and sizes, we have the following Azaleas:

OCCINEA MAJOR. Early. A very famong the best in this color. Tall grower. COCCINEA MAJOR. A very fine orange-red—

DODD'S PINK. Similar to Elegans, except bushier.

AZALEAS, continued

DUKE OF WELLINGTON. Midseason. Rosy salmon with dark center. Medium grower. Very desirable.

GLORY OF SUNNINGHILL. Midseason. Large, orangescarlet flowers. Moderate growth and a free bloomer.

LILACINA. Late. Lavender-lilac flowers. Tall, fast grower; very hardy.

PRIDE OF DORKING. Late. Deep carmine-red blooms, freely produced. Moderate grower.

SUBLANCEOLATA. Late. Very large, showy, orangered flowers.

Remember that Azaleas need rich soil, acid in reaction. Mix quantities of peat with the soil before planting.

Macrantha Azaleas

Varieties belonging to this group bloom late, often throughout the summer. Flowers are large and the foliage is small, dark green. These are very nice bushy plants with blooms in very desirable colors.

The following types were secured from K. Sawada. All are very interesting, and of slow growth.

BENI-KIRIN. Double, brilliant blood-red. Very pretty.

FUJI-NISHIKI. Large flowers with wavy petals; white striped lavender. Fine for separating varieties with stronger

MACRANTHA, SINGLE CLEAR PINK. A very lovely variety of strong, slow, compact growth. Foliage is very pretty. Blooms over a long period. The best of this group.

MACRANTHA, DOUBLE PINK. The large, hose-in-hose, clear pink flowers are fine for cutting. Upright, strong grower.

MACRANTHA, RED. Large, single, dark orange-red flowers. While not so free a bloomer as the pink varieties, the color is very rich in semi-shade.

OKINA-NISHIKI. Orange-red. Blooms over a long period.

SAKURAGATA. Dark crimson, white throat.

WAKAMATSU. Large, delicate purple.

WAKAEBISU. Bright salmon-pink. Large, very dainty flowers of hose-in-hose type.

Small plants, 50c each; stronger plants, 75c; also a few at \$1.00 each.

Belgian Type Azaleas

These are slow growers with beautiful flowers, well worth the extra care they require. Do not buy them unless you are willing to take a chance, for they are more difficult to grow.

TRIOMPHE. Large, semi-double, dark crimson-red.

VERVAENEANA. Double, salmon-rose edged white.

VERVAENEANA ALBA. Double, large, pure white.

Small plants, 75c each; strong plants, \$1.00; choice plants, \$1.50 each.

Cash and Carry

Our 90-day Sale of Azaleas will be held in December, January and February. Watch Tampa Tribune for sales prices. This is our one big event each year. We close our eyes and let the plants go out as fast as our customers can take them away in their cars. People come back again and again for more. We lower the price down to the bottom, so be sure to get your share. Add 20% to our advertised sales prices for Azaleas shipped by Express, to pay for packing.

New and Rare Grafted Hibiscus

These are the Hibiscus varieties that we consider the choicest and rarest of all. They are marvelously beautiful flowering shrubs and you should by all means have some on your own property. The many new and delightful colors will make a beauty and wherever they are planted. colors will make a beauty spot wherever they are planted.

We were interested enough in Hibiscus to send our own "expedition" to study them. The Boss, Willie and Mr. P. Mark Parthemore spent three weeks driving over 4000 miles searching them out and photographing them and visiting Hibiscus hybridizers and growers in Florida and all along the lower Gulf Coast into Texas and back. The result is that we have the very choicest varieties from Texas, California and Hawaii to offer our customers this year.

Some of the following varieties are available in small sizes only; some in medium sizes and others in large, testing-out sizes. The prices are somewhat higher than the regular grafted Hibiscus, but these fine plants are worth the extra cost. They are all potted in the finest compost and have strong root systems. Remember that poor weak plants are never a bargain. Our stock of these varieties is small, so order at once.

- ANN BALDWIN. (Hawaiian.) Single, large, light claret with gold edges and tips on the petals. An unusual color that makes it doubly desirable.
- BRIDE. A huge, single flower of pale blush-pink fading to white, with overlapping crepe-like petals. for its beauty is indeed reminiscent of a bride. Well named,
- BURGUNDY. Large, double, beautiful dubonnet to maroon, with a velvety texture. A really high-class flower.
- (Teas.) Large, double, beautiful dubonnet BURGUNDY.
- to maroon, with a velvety texture. A really high-class flower.

 BUTTERCUP SINGLE. (Y-11 Holmes type.) A large flower of lemon-yellow. Overlapping petals with faint bright reddish markings in the throat and on the edge; heavily veined. Our big bush is usually loaded with flowers. Very popular popular.
- HARLES JAMES, JR. (James.) Large and double; especially fine in Miami, although with us it does not attain such large flowers. Reddish golden orange outside petals, CHARLES tipped golden yellow.
- COOPER'S RANCH. (Hawaiian.) A strikingly lovely bloom. Large, single, flat, pinkish gold with a grained effect.
- DOUBLE RED POINSETTIA. (James.) A dark, velvety bloom in two or three shades of deepest crimson with huge, twisted petaloids. A beautiful cut flower; popular for wearing in the hair.
- (Anderson.) Very large, double, in half shade the colors are deeper. multicolored We consider this to be among the very prettiest Hibiscus.
- FIERY FURNACE. (Teas.) Large, single, intensely bright golden orange.
- FIRESIDE. (Teas.) A large, single flower with ruffled edge. Yellow shading to brighter and lighter tones; center deep red. Exceptionally pretty.
- FLEDA V. HUGHES. Very large and double. Light mahogany with five-pointed center; gold reverse on primary petals.
- GLORIOUS B. The choice of the Hibiscus fancier, although a weak grower. Large, single bloom, yellow at the outer edge and becoming burnt-orange with glowing sunset tints and a silver-mauve center. Very much in demand.
- HAWAIIAN GOLDEN. Large, double, bronze flower with
- light center. A slow grower with very fine flowers.

 HURRICANIA. (Johnson.) Large, double, Flamingo type but darker bright pink. A good color. Odd foliage.

MANDALAY. Huge, single, ruffled, lemon-yellow flowers with a very large white center and a deep purplish pink eye. Truly outstanding, although not always of top size.

McINTYRE. Very well-formed, enormous, single flowers with ruffled petal edges. The color is apricot-bronze with light center and deep pink throat.

McINTYRE, JR. Very similar to M and darker flowers. A better grower. JR. Very similar to McIntyre, with smaller

MINALILA. (Teas.) Extra large and single. Almost white with bluish pink veins and ruffled edge touched with yellow; clear white throat.

MONARCH. (Teas.) Enormous, double, flat, rosette-shaped flowers of deep dark crimson shading to almost mahogany. Spectacular, new and rare.

RS. FRED ANDERSON. (Anderson.) Large, single, flat, ruffled flowers; yellow with pink center. The late George Anderson named this in honor of his brother's wife. MRS. FRED ANDERSON.

NEUTRALITY. (Anderson.) Medium to large in size, single; brilliant orange-vermilion. Slow and hard to grow, but worth striving for.

NEUTRALITY, JR. A large, single, flat flower like Neutrality but a better grower.

PETER PUMPKIN. (Parnell.) ETER PUMPKIN. (Parnell.) Small, single flowers of pumpkin-yellow; white center. A free bloomer that is an attractive addition to the yellow Hibiscus.

SUPERBA. Huge, single, exquisite yellow upon first opening, changing to golden yellow by noon. The flowers are very large; the color is clearer when sheltered from the hot sun.

4-in. pots when available, \$2.00; 5-in. pots when available, \$2.50. Gal. cans, our largest selection, \$3.00 and \$3.50; 4-gal. sizes some varieties, \$5.00.

GRAFTED HIBISCUS

Perhaps those of us who live in the South do not appreciate what a treasure we have in the Hibiscus. beautiful shrub is forever associated with tropical isles and romance, but often we need a visitor from the North to open our eyes to the fact that our part of the country is favored indeed to be able to grow it.

Here at our nursery we have been Hibiscus fans for a long while. We make trips all around to hunt out new varieties, and we are pretty proud of the splendid collection that we have as a result. We have some genuine beauties, both single and double, in many different flower formations. The hybridizers have been at work and have created many novel varieties—new colors and single, double, and semi-double flowers. Many Hibiscus varieties have different local names because they have become mixed. We make every effort to keep the names correct to the best of our knowledge. We have given appropriate new names this season to some varieties, by popular demand from our customers, but we still list the old name too where changes have occurred.

We take the greatest care in selecting, growing and handling our Hibiscus plants, for truly they are our pride and joy. Every time you buy from us you get superior stock, first class in every way.

Hibiscus are tropical plants and need a protected location. Always bank them up with earth during freezing weather. On grafted plants remove all sprouts from the understock; otherwise the graft may die out. Give Hibiscus well-prepared soil, with plenty of humus and good drainage. Full sunlight and regular feedings of fertilizer are needed. For extra-choice bloom prune and spray as you do roses. All varieties are valuable for cutting and some of the newer sorts remain open the second day.

AGNES GAULT. A large single variety shaded satiny pink with white veins.

APEX. Single, medium to large in size. Orange-yellow with pink veins and reddish pink center.

HIBISCUS, continued

BAPTISTI. Small, semi-double; intermingled narrow red and white petals. Unusual.

BLAZE (BIG NEW SPANISH RED). Large and double with some petaloids. Orange-red with yellow glow. Very pretty.

BRIDESMAID. Large, flat; brilliant rose, darker than Mrs. Johnson.

BROWN. Medium size, single. Brown-orange with deep reddish brown center and golden veins.

CARMEN. (Valencia Gardens.) A large, single flower similar to Glorious B but a stronger grower. Golden orange with pinkish center.

CELIA. Double, medium size; bright rose.

COL. PARRISH. Small to medium in size. Beautiful bright golden yellow with white center and light pink throat.

COOPER'S GIANT. A large, single, reddish bronze flower.

DAISY ENTWISTLE. Large, single; yellow flushed pink, with red eye.

DELORES. Large and double; purplish with a dark center. A strong grower.

DOUBLE APRICOT (Anderson No. 315). Small, bright apricot flowers.

DOUBLE BRIDE. (Valencia Gardens.) Large flowers, creamy white.

DOUBLE DEEP SALMON. Medium-sized, full, peony-type flower with petals of bright sunset-orange and several beautiful yellow stamens.

DOUBLE IMPROVED PEACHBLOW. A wonderful grower, with good foliage and free blooming habit. Large flower shaped much like Peachblow, with the outside tips of the petals yellow becoming apricot-peach. In cold weather it is sometimes single.

DOUBLE ORANGE (Anderson No. 237). Large, two-toned orange and reddish orange.

DOUBLE PINK NO. 3. (Hendry.) Lovely rose-pink; large blooms of exquisite form. Very popular.

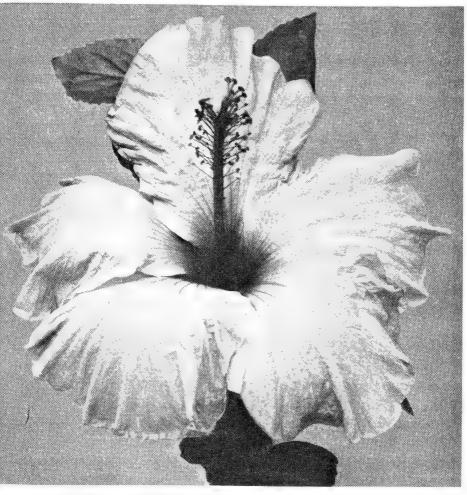

- DOUBLE PINK AND WHITE (Anderson No. 159). Loose, double form; white and bright pink. Grows and blooms easily. A very decorative bush when in bloom.
- **DOUBLE RED PEONY.** Old-fashioned peony type with large, full flowers of blood-red. An excellent grower with shiny green foliage when grafted. Does not do well on its own roots. A good bloomer.
- **DOUBLE RED NO. 3.** (Hendry.) A full double, medium-sized flower of brilliant red.
- **DOUBLE WHITE.** (Anderson.) This variety faintly shows pink.
- **DOUBLE WHITE.** Very beautiful, medium-sized flowers full of petaloids, which make it distinctive. Not pure white.
- EDNA LINDSEY. (Johnson.) A single, very pretty pink flower.
- ELLA THANT. Light pink with darker throat; medium size.
- FANNY PECK. (Anderson.) Large, semi-double, ragged in appearance, very variable cerise color. A strong grower.
- FIG LEAF. Large and single. Buff and purplish pink with deep dubonnet center—a brilliant flower, heavily veined. A strong, bushy grower with large foliage.
- **FLAME.** Tomato-red to flame color; single, medium size. Unusually strong growth; upright.
- FLAMINGO PLUME. (Hawaiian.) Large, loose, double flowers resembling red flamingo plumage at its best.
- FLOPPY. (Anderson.) Single; orange with reddish markings.
- FLORID. (Valencia Gardens.) Single, large, flat; pinkish orange with gold center veining and grained effect. Very pretty.
- **GLORIANA.** Single; pink center and gold edge. Very attractive.
- GLORIOUS A; GLORIOUS C. Both these varieties are hard to grow and we gave them up.
- GOLDEN DAWN. A nice variety, flowering freely. Large, single; golden orange with red veins and brown center.

Hibiscus, Flamingo

HIBISCUS, continued

- GOLDEN HARVEST. (Anderson.) Double, loose, two-toned bronze bloom.
- GOLDIE DOUBLE. (Anderson.) Small flowers of reddish orange with golden veins and twisted petaloids.
- HALEAKALA. Single, large, very ruffled; sunset colors.
- HELEN WALKER. Single, medium size, very ruffled. Peachpink fading to flesh-pink with a deep pinkish red throat.
- **HENDRY'S EXTRA PALE PINK.** Large, single; almost white, rather faded-looking. Strong grower.
- INDIAN CHIEF. Large, single; scarlet-orange. Extremely strong grower.
- JANE WITHERS. Double, coppery bronze flowers of medium size. Blooms well; upright in growth.
- JIGORA. (Teas.) Large, double; golden orange with crimson and vermilion at the base of the petals. Similar to Mme. Chiang Kai-shek but smaller flower.
- JUNIOR'S COMPANION. Double. Similar to Charles James, Jr. Smaller and not so pretty.
- KAMA PUAA (Hendry 19). Large, single, with curved edges. Fawn colored into mauve, with light pink center.
- KAMA PUAA. (Teas.) Prettier than the regular type. Large, flat, single blooms.
- KING OF TONGA. A large, single, darker sport of Agnes Gault.
- KONA. Large, double, peony type. A very showy pink flower, often with several yellow stamens. One of the best new varieties. Free flowering and strong growing. Does not do well on its own roots.
- LUNA. Large, single; ruffled, overlapping petals. Buff with white center faintly marked pink; pink eye. Strong grower. Very fine.
- MACAW. Single, large to medium size. Bright sunset shades—reddish orange with darker throat; outer edges of petals veined yellow.
- MAHOGANY. Double; old mahogany tone.
- MAIDEN BLUSH. Large, single, old-fashioned rose color; slightly ruffled edge.
- MALATOA. (Teas.) Large, single; creamy pink, almost ivory, with deep carmine throat.
- MARGARET SHAFFER. Single, small to medium in size. Overlapping petals with rolled edge; ivory with light vermilion throat. A poor grower.
- MATENSIS. (Henry.) Highly variegated foliage—green and white tinged red. Single, small pink flowers on a low plant.
- MILLER DELRAY. Small, single; pastel pink with deep pink veins and bright pink throat. Excellent for mixing with darker colors.
- MINIATURE ALTHEA. Small, double; purple with reddish center. Slow, compact, bushy grower.
- MINNEWA BELL. Small, single; light pink with pink veins. The center is a large star of rich dubonnet color. Very striking and free bloomer.
- MRS. HASSINGER. (Hawaiian.) Single, medium size, flat. Bright rose-red with star-shaped, maroon center. Another good grower.
- MRS. JOHNSON. (Hawaiian.) A very large and spectacular single flower—one of the best. Exquisite creamy rosy pink petals blending to a lighter edge. A free bloomer and vigorous grower. Adding to its beauty are occasional twisted petaloids that appear at the end of the style.
- MRS. MARY MORGAN. Semi-double, deep bright rosy pink with pink veins and deep maroon throat. A rank grower and free bloomer.
- MRS. MURIEL EVANS. (Teas.) Medium size, single; rusty bronze shading to a carmine throat.

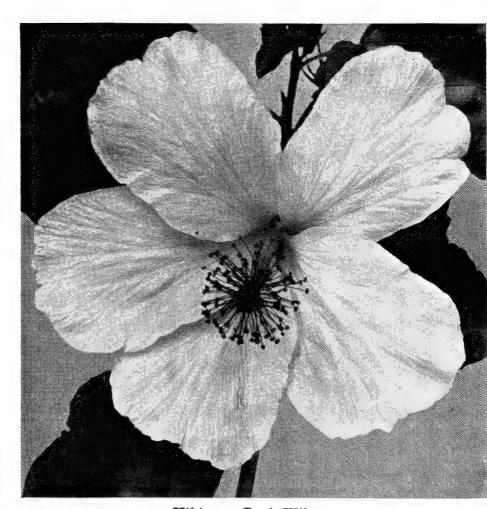

Hibiscus, Mrs. Johnson

- MRS. WM. WHITE. (Hendry.) Sometimes called Talisman because its color is similar to that of the Talisman rose—golden orange. Double, medium size. An abundant bloomer and a strong, upright grower. For years this has been one of our best sellers.
- MYRNA LOY. A double cross with Althea. Lavender fading to bluish lavender with age.
- NO. 62. Name is unknown to us. Flowers very similar to Mme. Chiang Kai-shek but half the size. Solid petaloids in center. Good bright colors—apricot-bronze to golden yellow.
- OLD GOLD. Large, single; old-gold shading to violet, with rose center. Extra good. Blooms freely.
- PAINTED LADY. (U.S.D.A.) Single; deep pink with white veins and red center.
- PERFECTION. (Johnson.) Single, large, overlapping petals; tufted orange and gold. Similar to Glorious B but a better grower.
- PIMENTO RED (Brick Red, from Miami). Large, single flat; very rich color like a ripe pimento, with a small, deep vermilion throat.
- **PRINCE TAKAMATEO.** (Teas.) Very large, single, velvety deep red with darker red throat.

We offer a complete landscaping service to those who want a good job done by men who know how to do it. Whether it is a shade or palm tree for your lawn or a citrus grove or a rose garden that you need, we shall be glad to look over your grounds, advise what is the best plant material for your purpose, and then do the whole job for you. Call on us for help in any landscaping work.

HIBISCUS, continued

- RAINBOW. Small and dainty, single flowers of golden buff with light pink throat.
- RUTH WILCOX (Purity). Large, beautiful, fragrant flowers often lasting two days. Single. The all-white petals make it a choice bloom. A free bloomer at night.
- **SEMI-DOUBLE RED.** Small to medium in size; terra-cotta with yellow stamens.
- SHIRLEY TEMPLE. A dwarf plant with small flowers about the same color as Jane Withers.
- $\begin{array}{ll} \textbf{SINGLE ORANGE (Hendry Y-11).} & \textbf{Single, ruffled flower of} \\ \textbf{golden orange.} & \textbf{A strong grower and free bloomer.} \end{array}$
- SNOW WHITE. Large, flat, single; pure white, overlapping petals. Low bush of slow growth. Very nice.
- **SOPHISTICATE.** (Hawaiian.) Single, huge, overlapping petals; yellow edge merging to pink.
- SPANISH RED. Small, double; brick-red. Dwarf.
- STELLA LYKES. Medium-sized bloom with a single row of true petals and a center of petaloids. The finest golden apricot. Free blooming.
- SUBVIOLACEA. Double; red with purple throat.
- SUNNY SOUTH (Semi-Double Bronze-Apricot). Large, semi-double; bronze-apricot. Upright growth. Most appealing.
- TANGERINE (Henry's Y-250). Solid tangerine color. Flat flower, closing early. A good bloomer.
- VAN DYKE. Large, single; mauve-pink with large maroon center.
- WHITE WINGS (Alba; Floribunda). Five snow-white petals with deep reddish pink center. Medium size.

Hibiscus, Ruth Wilcox

SINGLE YELLOW HIBISCUS

Although in the past the Double Yellows have outsold the Single Yellows, we find here that the singles surpass the doubles in blooming. We have a fine group to select from.

BUTTERCUP SINGLE. See New and Rare varieties, page 8.

CALIFORNIA GOLD. Single, large, flat; gold to light yellow with a pink center.

DELIGHT. A handsome, large, well-formed flower ranging from lemon to butter-yellow.

EARL ANTHONY. The finest of all the single canary-yellows. Large blooms on a splendid plant.

FT. MYERS SINGLE YELLOW NO. 101. Small yellow to pink flowers. A fast-growing plant with good foliage.

KILAUEA. A choice flower. Single; yellow with white center or often pink in the center upon opening, fading to white.

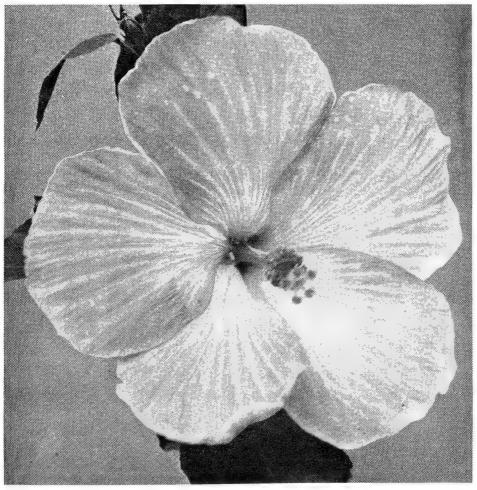

KILAWAIAI. (Teas.) A single bright canary-yellow with white center and reddish pink veins in the throat. Unusual foliage.

MANDALAY. See New and Rare varieties, page 9.

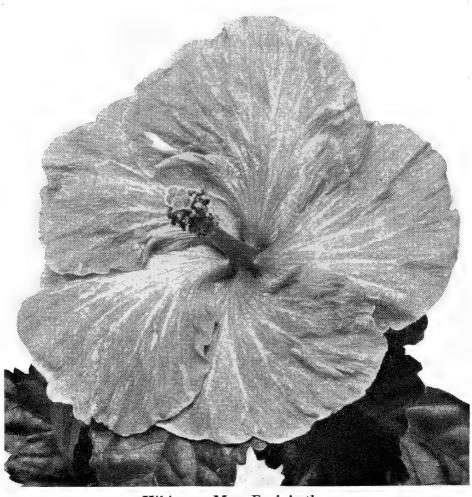

RUFFLED GIANT. Large, single. Light yellow; white center. Often produces really mammoth flowers and is very nice when up to par.

SINGLE YELLOW, WHITE CENTER. Medium-sized, deep yellow bloom with a large white throat. Good foliage.

Our Nurseries are open to visitors the year round.

Single Yellow Hibiscus with white center

Hibiscus, Mrs. Earl Anthony

DOUBLE YELLOW HIBISCUS

We offer here the five double yellow varieties that have proved to be the most popular with our customers. In response to requests from these buyers, we have this year given appropriate names to these varieties rather than the original seedling numbers. In addition to these varieties, we have ten others in smaller quantities, desirable also but not so well known. Ask us about them.

- SUNGOLD (No. 40). An outstanding medium-sized, double variety of dark gold with a darker center. One of the best. Our customers' choice of the dark yellows.
- BUTTERFLY (Mrs. Blair, No. 111). Handsome, large and well formed. Butter-yellow with a light center. Truly a beauty, growing well and blooming freely. An upright grower.
- CANARY (Homestead). Very pretty, full double ball type. Canary-yellow with reddish orange in the deep center. A strong plant, blooming abundantly.
- CANDLELIGHT (Anderson No. 161). Beautiful deep golden yellow with a darker orange-yellow center. Slow growth, bushy and floriferous.
- CROWN OF BOHEMIA. Large, spectacular flower of golden yellow shading into copper-orange with reddish throat Our customers rave over this one.

Big extra-strong gallon cans, our special standard, \$2.50; specimen plants, \$4.00 and \$5.00. We have limited quantities of several varieties not listed. When available, same price as above.

Own-Root Hibiscus

Here are many old-time favorites that grow more easily and bloom more freely. Strong and hardy.

ALTHEA. Single, bright orchid. 4-in. pots 75c; gal. \$1.50.

AMERICAN BEAUTY. Double; dark pink. Very attractive. 4-in. pots \$1.00; gal. \$2.00.

BAPTISTI. Variegated red and white. 4-in. pots \$1.00; gal. \$2.00.

BETTY CHALK. New. A brilliant single red with extra deep red throat. Medium-sized flowers. Strong grower; good foliage. Very choice indeed. 4-in. pots 75c; gal. \$1.50. deep red throat. Medium-sized tlowers. Strong group, good foliage. Very choice indeed. 4-in. pots 75c; gal. \$1.50. CALIFORNIA GOLD. Single; gold to yellow with pink center. Gal. \$1.50.

COLUMBIA. Very large, full, peony form, carmine to rosepink. Often deep salmon-pink with petaloids and yellow stamens. 4-in. pots \$1.00; gal. \$2.00.

DARK-EYED GRANDIFLORA. Darker color than Grandiflora, with darker eye.

DOUBLE IMPROVED PEACHBLOW. Large, old-fashioned sort with dark center. 4-in. pots \$1.00; gal. \$2.00.

DOUBLE PINK AND WHITE (Anderson No. 159). White and bright pink. 4-in. pots \$1.00; gal. \$2.00.

ELEANOR ATHERTON. (Hawaiian.) Large, single, ruffled; light pink with crimson eye. Large plant; very free bloomer.

EUTERPE (Single Salmon). An old-fashioned favorite.

FIJI. Medium size, deep rose-red with deep red throat.

FLAMINGO. Very large; double. Absolutely a lovely carmine-pink. 4-in. pots \$1.00; gal. \$2.00

FLORIDA SUNSET. Small single flower of bright sunset shades with a bronze margin on the outer edge of the petals. 4-in. pots 75c; gal. \$1.50.

FT. MYERS SINGLE YELLOW NO. 101. A fast grower with small yellow blooms. Gal. \$1.50.

golden orange with red GOLDEN DAWN. Large single; veins and brown center. Gal. \$1.50.

GRANDIFLORA. Light pink with dark eye.

Hibiscus, Improved Peachblow

OWN-ROOT HIBISCUS, continued

HONOLULU. Single, large, white with red center. Very free bloomer.

INDIAN CHIEF. Large, single, orange-red. 4-in. pots 75c; gal. \$1.50.

JOHORTI ISLAND. Light pink with throat shading to deep red. Medium size. Qt. can 75c; gal. \$1.50.

KID SMARTIE. Small flower of bright bronze-red. 4-in. pots 75c; gal. \$1.50.

LA FRANCE. The freest flowering of all Hibiscus. Bright pink, small. Strong, upright growth. Tampa Special.

LA FRANCE TYPE, RED. Similar to La France. Small red flowers.

LILLIAN WILDER. (Hawaiian.) Large, single, delicate pink to white with deep pink throat. A prolific bloomer; easy to grow.

LUNA. Large, single. 4-in. pots 75c; gal. \$1.50.

LUTEA. Cream-yellow, dark red center. 4-in. pots 75c; gal. \$1.50.

MALATOA. Large, single; creamy pink, almost ivory, with deep carmine throat.

MINERVA. Large, strong grower. Single, orchid-pink flowers of medium size.

MRS. HASSINGER. Single, flat; bright rose-red with star-shaped maroon center. Gal. \$1.50.

OLD GOLD. Large, single; old-gold shading to violet, with rose center. Gal. \$1.50.

PAINTED LADY. Single; deep pink with white veins and red center.

PEACH BLOW. Double, large, old-fashioned peach-pink with dark maroon center.

PIMIENTO, RED. Large, single, flat; pimento color.

PSYCHE. Small, single red bloom with feathery edge. A good grower and bloomer

RUTH WILCOX. Large, single, fragrant; all white. Gal. \$1.50.

SCHIZOPETALUS. Single, pink to reddish pink; small dainty flowers; long stamens.

SINGLE PINK. Large flowers. Good grower.

SINGLE SCARLET. Large; flaming red. Strongest grower. 4-in. pots 60c; qt. 60c; gal. \$1.50.

VENUS. Single, large, pinkish white with red throat. Weak grower. Should be grafted.

All own-root Hibiscus, 4-in. pots 60c; qt. cans 60c; gal. \$1.00; 4 gals. \$3.00, \$3.50 and \$4.00, unless otherwise priced.

A beautiful iron gateway at Dr. David Murphy's home in Tampa. The wall is made of hundred-year-old bricks, hand-made, which were brought here from Mobile.

A tall spire of Podocarpus, with a low facing of JASMINUM UNDULATUM. At the rear is a specimen of single white Oleander, with WASHINGTONIA ROBUSTA behind it.

PODOCARPUS

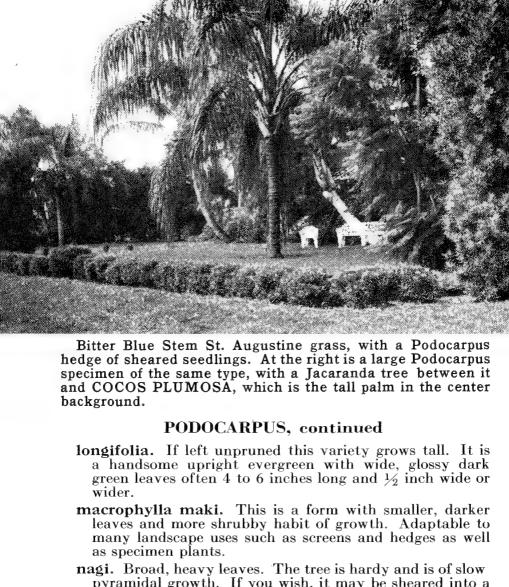

We call these evergreens the "Taxus of the South," and we wish we had some way of conveying to you just how highly we think of them. We consider these to be the most desirable of all evergreens for landscaping and beautifying the home grounds in Central Florida. They are excellent evergreen shrubs and trees with mostly narrow but sometimes broad leaves. Many species exist but we offer only the very best in addition to the new hybrids. Some of these hybrids for Central Florida are as good as Macrophylla maki and some are better. Some of them are dwarfer and have smaller leaves than Macrophylla maki.

Maki is one that we recommend for shearing and hedges. It is a fine plant for trimming into desired shapes. Until we have more time to study the various varieties which we hope to name or number, we simply offer them as hybrids, and suggest that you come to the nursery and

make your own selection.

elongata. Thought by some people to be the most beautiful of all Podocarpus. It is a large, elegant plant with soft, finely cut, pointed bright green foliage. Can be pruned finely cut, pointed bright green foliage. Can be pruned when necessary to any shape desired and for this reason is very adaptable. A wonderful plant for backgrounds or large corners, and against garden walls its fern-like leaves are displayed to perfection. Plant in sun or part shade. $R \rho \gamma R$

CAMELLIAS

The Loveliest of All Flowers

The Camellia has been a favorite in the South for such a long time that it is difficult to picture southern gardens without it. Songs and stories have been woven about it, but the thousands of specimens in small home grounds as well as the magnificent large estates about the countryside prove that the Camellia is more than a legend of the past.

Camellias succeed very well in Central Florida. Ideal growing conditions are provided by good soil composed of peat or muck well mixed with sandy topsoil and leaf mold, all used in generous amounts with plenty of moisture. Either full sun or dense shade or anything between these two extremes suits Camellias, but perhaps the one most important requirement is plenty of moisture. That is why the moist atmosphere of Florida and the Gulf Coast gives such good results.

We are always testing and experimenting to find better ways of bringing these exotic shrubs to you in the finest forms. We are continually searching beautiful gardens all over the South to discover new varieties, and what we offer you is the cream of the crop. We follow the very best horticultural practices—fertilizing, spraying, mulching, and watering are all necessary for good results.

Our stock consists of hundreds of small and medium-sized plants, and for those who are looking for a real gem we can also supply large specimens. They are transplanted and root pruned, and we handle them in accordance with the most improved modern methods. We have moved many fine large old plants with perfect safety, and can do the same in your garden.

Grafted Camellias

Some varieties of Camellias are available only in grafted plants, and some cannot be grown successfully in Central Florida on their own roots. Grafting is also the quickest method of obtaining rare sorts of flowering size. Considering this, we do not think grafted Camellias are unreasonably expensive. We offer many of the rarest and newest varieties grafted on strong growing roots. Understocks vary in age from 2 to 5 years; most of our grafts are 1 year old. Several varieties are obtainable in fine 2-year-old plants, and we have a large number of nice big budded specimens 3 years and older.

Almost every Camellia in our Nurseries has been transplanted once or more

ALBA PLENA. Very double, snow-white blooms of the formal type. Very popular. Early—October through January. Class A.

Camellia, Alba Plena

CAMELLIAS, continued

- ARAJISHI (Aloha). Deep red, peony-shaped blooms. Earliest flowers are likely to be deep rose-pink. Profuse, early bloom, beginning in August. Rare.
- AUNT JETTY. Bright red. January through March. Rare.
- BEALI ROSEA. Double, deep pink, about 4 inches across, displaying stamens in the center. March, April. Class A.
- BRASSENNIE. Double, white marbled rose-red. Rare.
- BRILLIANT. Large, very double, bright red. Class A.
- CATHERINE CATHCART. Delicate pink marbled with white. Formal type. February, March. Rare.
- CHEERFULNESS. Full double, deep rose. Midseason. Class A.
- MATHOTIANA VARIANT. Large, rose-formed flowers of rose-red marbled white. December through March. Outstanding among variegated sorts. Rare.
- C. M. HOVEY (Wm. S. Hastie). Very large, double, glowing crimson. Late February to April. Rare.
- DAIKAGURA. Large rose-red blooms of loose peony form. Early October through December. Rare.
 - **DEBUTANTE** (Sara C. Hastie). Delicate pink, of large peony shape, opening well. Fine for corsages. Late October to January. Rare.
- **DIXIE.** Very double, rose-pink. Strong grower with good foliage, very desirable. Early. Class B.
- **DONCKELARI** (Middletoni No. 15). Very large, deep red with splashes of white and a crown of prominent yellow stamens. Very lovely. December to March. Rare.
 - ELEGANS (CHANDLERI). Loose peony-formed flowers, cherry-red blotched white, with prominent yellow stamens. Very large. January. An old favorite. Class A. We have some fine ones this year.
- ELENA NOBILE (Napa Red). Vivid red. Late February through April. Class A.
- **ELIZABETH.** Double white flowers with occasional pink tints. Class B.
- ELIZABETH ARDEN. Soft pink and white, with deeper pink stripes on some petals; rose form, becoming semi-double as it opens. January through March. Rare.
- ELIZABETH BOARDMAN. Semi-double, pure white flowers of exquisite form and large size. December through March. Rare.
- FIMBRIATA (Fimbriata Alba; Alba Plena Fimbriata). Exquisite pure white flowers of the formal type; very double. November, December. Rare.
- FRIZZLE WHITE. White flowers 3 to 4 inches across, with wavy petals intermingled with the stamens. Rare.
 - FRAU MINNA SEIDEL (Pink Perfection). Double shell-pink blooms; compact and symmetrical. Our best seller, blooming over a long season. Class A.
- GIGANTEA (Magnolia King; Kilwingtonia). Large blooms variegated red and white, varying in form. January through March. Rare.
- GLOIRE DE NANTES. Large, semi-double, cerise blooms with the center petals often twisted and mixed with yellow stamens. Class A.
- GOVERNOR MOUTON. Deep red marbled white, in loose peony form or semi-double. January to March. Rare.

CAMELLIAS, continued

- HAKU-RAKUTEN. Large, semi-double, pure white; loose peony form. Rare.
- HARLEQUIN. Peony-type flowers of white, white striped pink, or solid pink. Late in bloom. Class A.
- HERME (Hikara Gengi; Jordan's Pride; Jenny Lind; Souv. de Henri Guichard). White with red and pink stripes; large, loose peony form; fragrant. Late November to mid-April. Class A.
 - K. SAWADA. Very double, fully imbricated flowers 4 to 5 inches across; 50 to 70 petals with edges rolled inward. White. Very beautiful, spectacular flowers. New. Pat. No. 431. Rare.
- LADY CLARE (Empress; Grandiflora Rosea). Very large, single pink blooms. November through February. Rare.
- LADY VANSITTART VARIEGATED. Rosy red streaks on white petals. Rare.
 - LAUREL LEAF. Soft pink blooms of formal or loose shape. Late November to March. Rare.
 - MATHOTIANA RUBRA (Julia Drayton; Purple Emperor; Purple Dawn; W. S. Hastie). Large, rose-shaped flowers of deep red. Easy to grow. Rare.
- MATOSIA. Full double, light pink marbled pure white. Early. Class A.
- MME. STREKALOFF. Peony-formed; light pink striped lightly with crimson. Class B.
- MONJISU. Semi-double, bright carmine blooms with a sating sheen. December to March. Rare.
- MRS. CHARLES COBB. Coppery bronze. A strong, heavy grower. December to March. Rare.
- POPE PIUS IX (Prince Eugene Napoleon). Large, double flowers of flame-red. Very popular. Class A.
 - PROF. C. S. SARGENT. Heavy, peony-formed, crimson flowers with a very double center of curled petals. October to the end of April. Very hardy. Class A.
- PURITY (Neige d'Ore). Dazzling white flowers of the formal type; petals slightly waved. November to April. Rare.
- REV. JOHN BENNETT (True). Gorgeous large semidouble pink blooms. Rare.
- REV. JOHN G. DRAYTON. Perfectly formed, deep pink blooms of loose peony shape. February to April. Rare.
 - MRS. K. SAWADA. Heavy flower 3 to $3\frac{1}{2}$ inches across, with 70 to 100 petals. Double, imbricated gardenia type, delicate pink shaded on white. We consider this a real gem. February, March. Pat. No. 481. Rare.
 - ROSEA SUPERBA (Mathotiana Rosea). Large flowers of rosebud form, deep pink. Late December through March or early April. Rare.
 - ROSE DAWN. Large, very double, rose-pink. Rare.
- ROSEA SUPERBA VARIEGATED. A pink form of Mathotiana Rubra, variegated white. New. Rare.
- Camellias prefer some shade and rich, moist but well-drained soil.

CAMELLIAS, continued

ROSE EMRY. An early crimson sort of peony form; full double. Class A.

SARA-SA. Semi-double, salmon-pink, sometimes speckled white. Midseason. Rare.

SCARLETT O'HARA. Dee scarlet, occasionally splotched with white. March, April. Rare.

SHIRO BOTAN. White, medium size. Rare.

SNOWDRIFT. Large, semi-double, pure white Rare

T. K. VARIEGATED. Semi-double flowers of light pink with a darker pink margin and yellow stamens. Class B.

TRICOLOR. Semi-double flowers of almost pure white to red and intermediate colors on the same bush. Class B.

VASHTI. Flat double flower 4 to 5 inches across. White with red stripes, sometimes pinkish white with red, and occasionally solid red or pink. Rare.

VICTOR EMMANUEL. Large, dark red blooms of loose peony to semi-double form. Late February to April. Rare.

VICTORY WHITE. Semi-double peony type, 4 to 5 inches across, with numerous small petaloids mixed with yellow stamens. Midseason. Rare.

WHITE CRANE (14B). Semi-double, pure white, with stamens in the center. Rare.

WHITE EMPRESS. Very large and beautiful, semi-double, pure white. Early to midseason. New. Rare.

WHITE GIANT. Very large, semi-double, pure white flower often 6 inches in diameter. Rare.

WHITE KING. Semi-double flower 4 to 5 inches across, with large heavy petals; snow-white with yellow stamens. Rare.

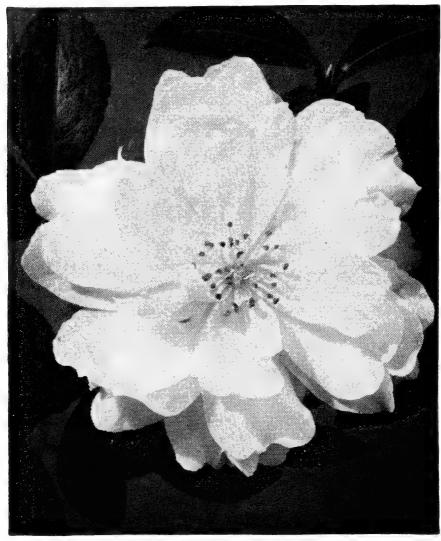

WOODVILLE RED. Large, gorgeous peony-formed red flowers. Very rare and desirable. New. Rare.

OUR COLLECTION OF CAMELLIAS INCLUDES APPROXIMATELY 50 VARIETIES NOT LISTED HERE. MANY OF THESE WE HAVE IN LIMITED QUANTITIES. WRITE FOR DETAILS.

Azaleas are very popular. We have a big selection.

In the foreground are the iris-like foliage of Morea, with Calla Lilies and the broad flat leaves of CLERODENDRUM FALLAX. The background is formed by a Podocarpus hedge, with a border of CEPHALOTAXUS HARRINGTONIA.

Sasangua Camellia

SASANQUA CAMELLIAS

Many people prefer Sasanqua Camellias for landscape work because this type is generally believed to be more quickly and easily grown. These plants make good evergreen shrubs and we highly recommend them, but as a matter of fact various Japonicas such as Gloire de Nantes, Jarvis Red, T. K. Variegated, and Harlequin are also good strong growers fine for general landscaping.

Remember that Camellias of all kinds need a well-drained, slightly acid soil rich in humus. Half shade is the best location, for flowers do not last long in the hot sun and plants do not bloom in dense shade.

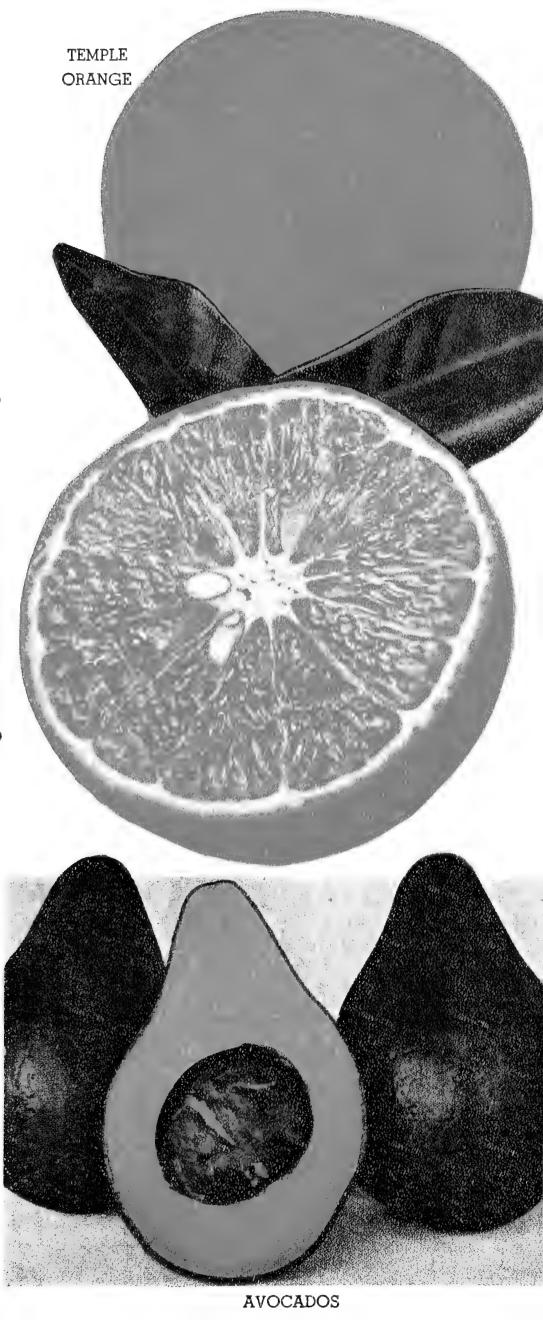

CLEOPATRA. Semi-double; rose-pink. 12 to 18 in., 2 to 3 ft., 3 to 4 ft.

DAWN. The finest Sasanqua we know. Semi-double; white, with blush-pink. 12 to 18 in., 18 to 24 in., 2 to 3 ft.

MINO-NO-YUKI. Double; pure white with golden stamens. Very early. 8 to 12 in., 12 to 18 in., 18 to 24 in., 2 to 3 ft., 3 to 4 ft.

A BEAUTIFUL PLANTING OF

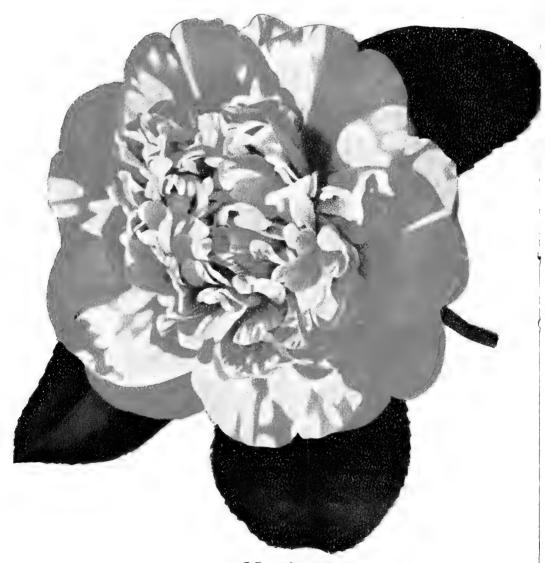

NG OF INDIAN AZALEAS

CAMELLIA CHANDLERI ELEGANS

ROSES

Roses are such a glorious part of gardening that they richly deserve soil and cultivation to suit their needs. In choosing a place to plant them, keep away from tree roots and badly drained spots, as well as locations where the air circulation is poor. Sandy soils should be improved by adding humus in the form of dairy or sheep manure, peat, leaf-mold, or heavy black hammock soil. Any of these materials available should be mixed into the soil to a depth of several inches. We used to import clay soil from Georgia for growing Roses but found it unnecessary and too expensive. You can grow good Roses without it.

December and January are the preferred times for planting Roses in Central Florida. We have always had better results with thoroughly dormant plants that have endured several killing frosts, and for this reason we never ship green ones. When you receive them, set the plants in a pail of water overnight; never expose the bare roots to the air.

For each bush dig a generous hole so that the plant may be set at the same depth as in the nursery. A pound or two of bonemeal may be given each one. Space the plants 2 to $2\frac{1}{2}$ feet apart, spread out the roots well, and carefully fill the hole with good soil mixed with the bonemeal. Pack the earth well, and water thoroughly.

Dairy or sheep manure, bonemeal, and commercial fertilizers like Vigoro are all good for feeding Roses. Regular applications are needed. A mulch of leaves or tobacco is advisable in the summer, as well as regular spraying.

No. 1, 2-yr. standard nursery grade, 75c each. Selected Jumbo grade, finest stock available, 90c each. Patented Roses. Priced per plant.

BUSH ROSES

- AMI QUINARD. HT. Medium-sized flowers of very dark, velvety maroon. A vigorous plant, blooming freely.
- ANTOINE RIVOIRE. HT. Rosy carmine color; double and fragrant. A free bloomer.
- **BETTY UPRICHARD.** HT. Nice buds and two-toned salmon-pink flowers with coppery carmine reverse. Bushy plant.
- CONDESA DE SASTAGO. HT. Most attractive two-tone Rose—Oriental red and yellow. Good free-blooming plant.
- CYNTHIA. HT. Rich Oriental red flowers.
- DAINTY BESS. HT. A single variety with large, somewhat ruffled petals of delicate rose-pink; maroon stamens. A great favorite.
- EDITH NELLIE PERKINS. HT. A favorite for many years. The outside of the petals is Oriental red and the inside is salmon-pink flushed orange. Very bushy.
- EDITOR McFARLAND. HT. Clear deep pink blooms on a strong plant. An excellent Rose that is very popular.
- E. G. HILL. HT. A thoroughly dependable scarlet Rose. Good in bud and bloom.
- ETOILE DE HOLLANDE. HT. Brilliant red; good size. Fragrant. Our best-selling red Rose.
- FRAU KARL DRUSCHKI. HP. Has been called the White American Beauty. Huge, double, snowy white. Very strong plant.
- KAISERIN AUGUSTE VIKTORIA. HT. A fine old sort with creamy white buds opening to showy white blooms. Very fragrant.

ROSES, continued

- **KONIGIN LUISE.** HT. A good white Rose, double and high centered. Leathery, glossy foliage.
- LADY HILLINGDON. T. Slender pointed buds and cupped flowers of apricot-yellow.
- LOUIS PHILIPPE. Bengal. A good dark red shrub Rose, long lived and everblooming. Ideal for landscaping, for it is easy to grow and adds plenty of color.
- LUXEMBOURG. HT. Coppery yellow, deeper in the center; slightly fragrant. Soft bronze foliage on a strong, spreading plant.
- McGREDY'S SCARLET. HT. Velvety crimson-scarlet, with slight tea fragrance. Very vigorous in growth.
- MRS. CHARLES BELL. HT. A fragrant shell-pink form of Radiance.
- **POINSETTIA.** HT. Large, double, bright scarlet. Well named. Compact, sturdy.
- PRESIDENT HERBERT HOOVER. HT. The color ranges through pink, orange, and flame tints; spicy fragrance. Plant extra tall and vigorous.
- RADIANCE. HT. Carmine-pink, globular flowers. An old standby.
- **RED RADIANCE.** HT. A rose-red form of Radiance that is just as popular.
- ROSLYN. HT. Golden yellow with orange on back of petals. Large, semi-double flowers on a compact plant.
- SOEUR THERESE. HT. Among the best golden yellow varieties. Semi-double, cupped blooms. Bronzy foliage.
- **THE DOCTOR.** HT. Enormous, semi-double, satiny pink flowers; fragrant. Vigorous and bushy.

SMALL-FLOWERED CLUSTER ROSES

(Polyantha)

- CECILE BRUNNER. Small, double, soft rose-pink. The perfect buttonhole Rose.
- **ELSE POULSEN.** Large clusters of semi-double, bright pink flowers.
- **FLORADORA.** Cupped, very double flowers of scarlet-red in clusters on good stems. Leathery foliage; much-branched plant. \$1.00 each.
- MRS. R. M. FINCH. Light pink, in large clusters.

CLIMBING ROSES

- CL. CECILE BRUNNER. Soft pink flowers freely produced.
- CL. ETOILE DE HOLLANDE. Scarlet flowers on a strong climbing plant.
- MARECHAL NIEL. Full yellow flowers on a vigorous plant.
- SOUV. DE CLAUDIUS DENOYEL. Fragrant, crimson flowers.

PATENTED ROSES

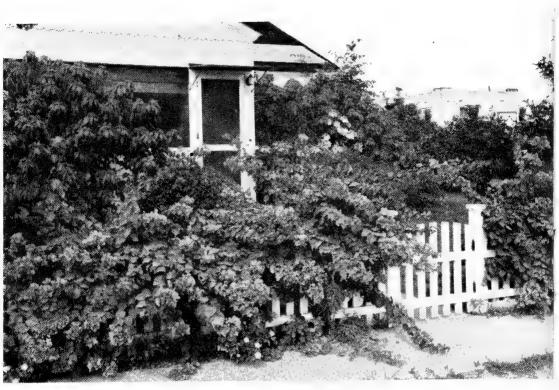

Among the patented Roses you will find the newer sorts that will add spice and interest to your Rose growing. These beauties have been well tested and should find a permanent place in many gardens. Their extra cost is justified by the fact that years of effort have gone into producing them. Try some of these patented Roses and get acquainted with the newcomers to the Rose world.

BETTER TIMES. HT. Pat. No. 23. Brilliant cerise flowers, large and double. Extra fine for cutting but splendid also in the garden. \$1.35 each.

ROSES, continued

- CHARLOTTE ARMSTRONG. HT. Pat. No. 455. Beautiful cerise-red flowers of large size, pointed in the bud form. Dark foliage on a compact plant. \$1.50 each.
- COUNTESS VANDAL. HT. Pat. No. 38. A lovely cutting Rose, carried on long stems. The color is pink with salmon tones, yellow at the base. Fragrant and high centered. \$1.35 each.
- DICKSONS RED. HT. Pat. No. 376. Velvety crimson-scarlet, with very spicy perfume. Bushy, open habit of growth. \$1.35 each.
- **DONALD PRIOR.** HPol. Pat. No. 377. Semi-double flowers of bright scarlet, carried in clusters that are like big bouquets. Very bushy, free-flowering plant, fine for borders and bedding. \$1.00 each.
- ECLIPSE. HT. Pat. No. 172. The streamlined Rose with elegant long slender buds. Deep gold in color. Profuse bloomer. \$1.35 each.
- HIGH NOON. HT. Pat. No. 704. A vigorous pillar Rose with loosely cupped flowers of lemon-yellow tinted red. \$2.50 each.
- HORACE McFARLAND. HT. Pat. No. 730. A beautiful coppery pink bloom, large and full, with spicy fragrance. Sturdy grower. \$1.50 each.
- KATHERINE T. MARSHALL. HT. Pat. No. 607. Deep rose-pink flushed yellow. Huge, lovely blooms that are very attractive for cutting. Upright, strong growth. \$1.50 each.
- McGREDY'S SUNSET. HT. Pat. No. 317. Well-shaped flowers of sunset tones—chrome-yellow at the base, shading to bright scarlet, with the reverse clear buttercup-yellow. Bronzy foliage. \$1.35 each.
- MIRANDY. HT. Pat. No. 632. Sweet spicy fragrance; color is garnet-red. Large and double (40 to 50 petals). Upright, bushy. \$1.50 each.
- NOCTURNE. HT. Pat. No. 713. Dark cardinal-red, large, fragrant and double. Blooms abundantly all season. \$2.00 each.
- **PEACE.** HT. Pat. No. 591. Large, open blooms, pale yellow, edged and flushed pink. Most attractive at all stages. Unusually dark foliage. \$2.00 each.
- PINOCCHIO. HPol. Pat. No. 484. Sprays of dainty blooms of Hybrid Tea form; pink suffused salmon. There is nothing better for miniature arrangements. \$1.25 each.
- ROME GLORY. HT. Pat. No. 304. Very large and globular, with old-time fragrance. The color is between red and pink; does not blue. \$1.50 each.
- RUBAIYAT. HT. Pat. No. 758. Rose-red, lighter on the outside of the petals. Very fragrant, double and high centered. An abundant bloomer. \$1.50 each.
- SHOW GIRL. HT. Pat. No. 646. Fine for exhibition because it is so large and well formed. Deep pink, on long stems. \$1.50 each.
- SUMMER SNOW. Pol. Pat. No. 416. Clear white clusters of bloom on a bushy plant. \$1.00 each.
- **TAFFETA.** HT. Pat. No. 716. Varying tones from strawyellow to begonia; most attractive. Double and fragrant, urn shaped in the bud. Glossy, bronzy foliage. \$2.00 each.
- TEXAS CENTENNIAL. HT. Pat. No. 162. Brick-red with lighter center. Very tall, sturdy plants. \$1.00 each.
- WORLD'S FAIR. HPol. Pat. No. 362. Clusters of deep crimson, fading to scarlet. Makes a showy mass of bloom on a bushy plant. \$1.25 each.

Don't ever make the mistake of trying to get good quality plants at cheap prices. Patronize only good nurseries and buy only the best in plants. It's the cheapest in the long run. Our plants have to be top notch; that's why we are so successful.

Here a large Buginvillaea has been given all the space it needs and the result is a magnificent spectacle that pleases the passer-by as well as the home owner. A few plants well placed are better than a mass of crowded plant material that never is given the chance to reach full perfection.

Buginvillaea

Strong growth and color run wild are characteristic of the Buginvillaea. Nothing can beat these easy-growing vines and shrubs for winter bloom over a long season. Just at the time when you most want plenty of color outdoors, the Buginvillaea is most obliging! It is not too particular as to soil and does not require large amounts of water. It outranks everything when it comes to showy flowering during the long winter blooming season. Some are dwarf, while others are strong, rank growers.

We invite you to come to the nursery and choose what you like best when it is in bloom. All of our plants are greenhouse grown and we can really boast about their good quality, as they are absolutely first class in every way. Do not confuse them with poor quality plants. At our prices they are bargains.

GOLDEN GLOW. Golden yellow, a deeper tone than Afterglow. A new and very pretty variety. A good grower of the vine type. Free flowering. 4-in. pots \$1.50; 5-qt. cans \$6.00; gal. cans \$5.00.

SCARLETT O'HARA. New brilliant red—the very reddest of all. This makes a most beautiful sight when in bloom. Why not be the first in your neighborhood to show it off? Stock is scarce now; the supply will be larger next year. 4-in. pots \$1.50; gal. cans \$5.00; grafted \$6.00.

BUGINVILLAEA, continued

Standard Varieties

- AFTERGLOW. Yellow-orange, changing to salmon and light rose.
- BARBARA KARST. Gorgeous crimson flower bracts borne along the stems. Much bushier and denser in growth and better all around than Crimson Lake. This is saying a great deal. 4-in. pots \$1.50; 5-in. pots \$2.50; gal. \$3.50; 5 qts. \$4.00; also larger.
- CRIMSON LAKE. Brilliant crimson. Very vigorous. An old reliable sort.
- CRIMSON LAKE JR. (Pigmy or bush type.) Crimson. Hard to get started but a real beauty. We had poor luck propagating it and have only 23 plants for this season. 4-in. pots, well established, \$2.00; gal. cans \$3.50.
- **DANIEL BACON.** Purplish pink; large, heavy bracts. We also have Margaret Bacon. Both of these varieties are rare and our stock is small. 4-in. pots \$2.00.
- **DAVID FAIRCHILD.** Named for one of Florida's most outstanding horticulturists. This is our best purple. Large heavy bracts. A strong grower and free bloomer. Good foliage. 4-in. pots \$1.50; 5-in. pots \$2.50; 5-qt. cans \$4.00.
- ELIZABETH DOXEY. White flowers which keep well in water. A beautiful addition and a strong, easy grower as well. 4-in. pots \$1.50; 5-in. pots \$2.00; 5-qt. cans \$5.00.
- GLABRA SANDERIANA. An old-fashioned sort, the most common of all. A bushy grower with heavy purple flowers. Trims back well. 4-in. pots \$1.00; 5-in. pots \$1.75; gal. \$2.50.
- PANAMA PINK. Lovely mauve-pink, like a sweet pea.
- **SPECTABILIS.** Rich deep purple; very large bracts. A good strong grower.
- All varieties not otherwise priced: 4-in. pots \$1.25; 5-in. pots \$2.00; gal. cans \$3.00 and \$3.50; 5-qt. cans \$4.00; nail kegs, specimens \$7.50 to \$10.00.

New seedlings sold by number:

- NO. 11. Low, spreading, very free flowering. Large pinkish red bracts. A weak grower that does not like to be pruned much. Extra choice. Every plant that bloomed here last year was sold. A real beauty. 4-in. pots \$1.50; 5-in. pots \$2.50; gal. cans \$3.50; 5-qt. cans \$4.00.
- NO. 14. Our stock has been small and we don't know much about this sort. The bracts were almost the color of Better Times rose. Sold well.
- NOS. 20 and 21. Both of these splendid new varieties are strong growers. They grew quickly and bloomed a long time, with gorgeous red flowers that extended the season. There is not much difference between them. We have a fine stock in 4 and 5-in. pots and 5-qt. cans.
- NO. 22. Large rose-red flowers. Very large leaves; extra strong grower. We have only a few 4 and 5-in. pots.
- NO. 99. Low, bushy, compact. A very slow grower with bright pinkish red flowers. Very pretty.
 - New numbered varieties, 4-in pots \$1.50; 5-in. pots \$2.50; 5-qt. cans \$4.00.
- All prices are for strong heavy plants, well staked and trained carefully, all with heavy root systems.

Buginvillaeas are easy to grow. A well-drained, sunny location suits them best. Be careful not to use too much fertilizer, for that makes them grow too fast and then they fail to bloom well.

.

FLOWERING SHRUBS

- ACACIA farnesiana (Opopanax). Very fine foliage on a 10 to 20-foot shrub. Fragrant flowers in small clusters. Qt. can 50c; gal. \$1.50.
- ALLAMANDA neriifolia. Low to medium size; large, dark green leaves. Deep yellow, trumpet-shaped flowers 2 inches across. Qt. can 60c; gal. \$2.00.
- ALTHEA. An old-fashioned southern shrub with lovely single flowers, orchid in color. 4-in. pots 75c; gal. \$1.50.
- BELOPERONE (Corsican Shrimp Plant). Drooping racemes of cream and purple flowers, enclosed in rosy copper bracts produced almost continuously. 3½ feet tall. Qt. can 50c; 4-in. pot \$1.00; gal. \$2.00.
- **BUDDLEIA** (Butterfly Bush). Flowers in long racemes at the ends of the branches. Quick growth.

lindleyana. Purplish violet.

officinalis. Lilac-pink.

salvifolia. Yellowish white with orange throat.

- BUXUS harlandi
 (Harland Box). Dark green, elongated leaves, rather square at the ends. Thick-growing plant.

- CARISSA acuminata. A small-leaved species making a very dense, compact hedge. Gal. \$2.50; 5 qts. \$3.00. grandiflora. Glossy evergreen foliage; white flowers and scarlet fruit. Qt. 50c; gal. \$2.00; 5 qts. \$2.50.
- CASSIA bicapsularis. Quick-growing shrub about 10 feet high, with small yellow flowers. Qt. 50c; gal. \$1.50.
- CESTRUM nocturnum (Night-blooming Jessamine). Large shrub with curved, willowy branches. Creamy yellow flowers open about sunset; very fragrant. Qt. 35c; gal. \$1.50.
- CHALCAS paniculata (Orange Jessamine). Grows 10 to 12 feet tall and is covered with small, glossy, dark green leaves. Profuse white blooms like orange blossoms; red fruits. Blooms several times a year. Qt. 60c; gal. \$1.50 and \$2.00; 5 qts. \$2.50.

- COCCULUS laurifolius. Dark green leaves 6 inches long, leathery and shining; black fruits in cluster. Grows 10 feet tall but may be kept clipped. Qt. 60c; gal. \$2.00; 5 qts. \$2.50.
- MYRTLE (Lagerstræmia indica). Vigorous and y grown. Immense clusters of bright flowers from CRAPE easily grown. spring till fall.
 - watermelon-pink Its outstanding characteristic is its heavy blooming habit that extends over a very long Dixie Brilliant. Watermelon-red, deeper period during the growing season. Large, strong, healthy plants, \$2.00 and \$2.50 each.
 - Flos-Reginae. Queen Crape Myrtle; Pride of India. A large tropical shrub or small tree. Plant in well-protected locations. Capt. Cross of Port Tampa has a fine big specimen with beautiful mauve flowers in large clusters at the ends of the branches. The large heavy leaves are almost evergreen. We also have a limited number of the pink-flowering kind, cutting grown, from our friend Mort Soule of St. Petersburg, who collected his tree in South America. Prices on request.
- Nana Caerulea. Dwarf Blue Crape Myrtle. A small but strong-growing, low-spreading grower with lavender-blue flowers in open, loose panicles which almost cover the plant. Small dormant plants, \$2.50 each.
 - Watermelon-Pink. Large, bright, unfading 2 to 3 ft., B&B transplanted, \$2.00 each, 3 to 4 ft., B&B transplanted, \$2.50 to \$3.00 each.
 - William Toovey. New. Very fine, producing solid masses of large, deep watermelon-red flowers. Dense, bushy growth. A prolific bloomer and a beautiful addition to the Crape Myrtle family. Highly recommended. Same price as Dixie Brilliant.
 - CROTONS. Shrubby plants with variegated foliage. For bedding or tubs. Need heat and moisture.

 Andre (Andreanum). Broad leaves marked yellow. Hardy. Cork Screw. Long red twisted leaves. Low, bushy. General Paget. Very broad leaves of green and yellow. Oak Leaf. Showy yellow, red, and green.

 Stewarti. Not so rich in color as Andre. Hardy and easily

grown.

HOLLY

ILEX opaca (American Holly). Desirable the year round, but especially at Christmas. Fine as lawn specimens and in the border and foundation planting. Give Holly an acid soil with plenty of organic matter in it. Our stock of this excellent plant is extra good and we have some fine big specimens

East Palatka. Almost smooth, light green foliage. Bright

red berries in abundance. A fast, strong grower.

Howard. Very dark, glossy foliage with some spines. An excellent sort with cheerful berries.

rotunda. A most elegant spreading tree of pyramidal, heavy, compact growth. Smooth dark green leaves with cluster of small bright red berries. This makes a majestic tree with drooping branches, deserving wide use. Very rare. Prices on request. Specimens only.

Taber. Narrow pyramidal leaves, dark green and spiny Very showy, large bright red berries.

vomitoria (Yaupon). Small foliage, bushy head, and profuse berries. 10 feet.

The home of Dr. David Murphy, in Tampa. The grass is Bitter Blue Stem St. Augustine, with a specimen Magnolia tree at the left and Hollies at each side of the entrance pillars.

HYDRANGEAS

These hardy, deciduous shrubs are low, bushy growers requiring rich moist soil and preferring some shade. The flowers are blue, pink, carmine, and white, but if the correct soil conditions are not maintained, the blooms will not come true to color. The flowers are produced early in the summer when others are scarce and are therefore a colorful addition to the garden. Our collection is small but desirable. Give Hydrangeas more than sand to grow in and you will be pleased with the blooms.

IXORA

A very fine landscape subject that stands shearing beautifully and blooms profusely. A first-class plant in every way, carrying our highest recommendation.

- coccinea (Flame of the Woods). Very showy evergreen shrub with bright coral-red flowers. A handsome plant for a sunny location. Stands wet feet and grows easily. Trims very well and blooms profusely. Not expensive. Qt. 60c.; gal. \$2.00; 4-gal. cans \$3.50 to \$4.00.
- flore-inteo (Yellow Ixora). Clear bright yellow flowers. Slower and weaker in growth than the preceding. Qt. \$1.00; grafts, gal. \$3.50.
- Ixora Hybrids. Lovely clusters of orange and off-red flowers. New. 4-in. pots \$2.50; grafts, gal. \$3.00.
- Macrothyrsa. Rare and scarce. Flowers deep red, in large clusters, very showy. Large handsome leaves. Grows slowly. We offer both own-root and grafted plants. Qt. \$1.00; gal. \$3.50.

JASMINUM

We can think of no group of plants offering more satisfaction for foundation and low border planting. They are easy to grow, long lived and free from insects. All the varieties listed here are real beauties.

- grandiflorum (Spanish Jasmine). Shrubby vine growing almost upright; branches clothed with bright green leaves. Clusters of large, fragrant, white flowers.
- Grand Duke. Very fragrant, double white flowers.
- ilicifolium. Rapid growing. Handsome foliage and star-shaped white flowers. Blooms almost continuously.
- primulinum. Drooping branches. Long sprays of fragrant, golden yellow flowers opening flat.
- pubescens. Attractive foliage and showy white star-shaped blooms. Hardy.
- simplicifolium (Wax Jessamine). Beautiful dark green, waxy leaves and star-shaped white blooms.

CITRUS FRUITS

The growing of citrus trees is one of the most important branches of our nursery business. The stock we offer has been carefully handled in the nursery and we have every confidence in its ability to transplant and grow well on your grounds. We use the very latest and best methods of growing this stock, and through root pruning, transplanting, and special feeding are able to produce really wonderful trees. Our particular specialty is large specimen trees. We cannot describe these for you; to be really appreciated they must be seen. They should be personally chosen from our nursery, and not ordered by mail or phone.

The scientific methods used in growing these fine trees make it possible to move them even when they are bearing foliage and fruit, with practically no setback. Our experience plus our equipment plus the right trees in proper con-

dition assure a successful job of transplanting.

GRAPEFRUIT

Duncan. A very juicy variety of good quality. December to May.

Foster. Purplish pink flesh. Very early.

Marsh Seedless. Heavy crops of fine quality. yellow skin.

Ruby. See page 3.

Silver Cluster. Heavy clusters of medium-sized fruits. Smooth bright skin; very juicy and delicious. Midseason.

ORANGES

Hamlin. Very juicy and sweet. Early.

Murcott. Quite a pretty tree—an upright open grower. The large, highly colored fruit has thin skin. Ideal for salads. Delicious flavor. Fine for home gardens. We have a good stock of several sizes.

Parson Brown. Medium size and fine quality. Early.

Pineapple. Heavy producer of juicy fruits. Midseason.

Satsuma. Medium to large; sweet and highly flavored. Extra early.

weet Seedling. Hardy; medium to large fruits. ornamental and an excellent shade tree. Midseason. Sweet Seedling.

Dancy Tangerine. Medium size, deep orange color, spicy flavor.

Temple. The most delicious of all fancy kid-glove Oranges. Beautiful foliage. Strong grower and heavy producer. Valencia. Large to medium-sized fruit of excellent quality. The best late Orange, year in and year out. The quality of the fruit always ranks high. Strong grower; free producer, February to August.

4 to 5 ft 7	50	-	8 to 10 ft \$20 00 to 35	00

TANGELO. Similar to grapefruit in growth, but the skin is more easily removed. Agreeable flavor. Same price as Oranges.

PLEASE NOTE: We transplanted into special compost pits over 800 choice citrus trees for yards and gardens—small, medium and large sizes in all the good varieties. Believe us, these are "super," all under irrigation, with spraying and three feedings, and mulched with tobacco stems. They are the best we know how to grow. Come select some of these trees for your garden. In addition, we have 100 big peach trees, 75 fine persimmons and 50 pecans.

Remember too we have other rare varieties of fancy citrus especially adapted to back-vard planting. Ask about

citrus especially adapted to back-yard planting. Ask about

them.

DWARF CITRUS

We grow the following Dwarf Citrus using the Japanese method of producing dwarf trees loaded with fruit. Well adapted to specimen use and general landscaping. Our collection of big specimen plants is the finest we have ever offered.

KUM QUATS

Marumi. Round, golden yellow fruit an inch long; sweet, aromatic.

Meiwa. Round, sweet fruit. Best for eating fresh.

Nagami. Golden yellow, oblong; well flavored.

CALAMONDIN. Orange-red fruit, somewhat flattened. Clear, acid juice, making a refreshing drink.

MEYER LEMON. Heavy bearer of large, highly acid fruit. Our best Lemon.

LIME

Hillisboro. Improved Key Lime, easy to grow. Bears heavy, small, juicy yellow fruit. We have a good stock of small sizes and a few big specimens.

Rangpur. Larger than Hillisboro. A strong, fast, upright grower. An abundant producer of round, smooth-skinned fruit with reddish pulp full of delicious juice. We are happy to offer this again. We have a few small trees and a few big specimens.

Tahiti (Persian). Extra fine large green Lime of top quality. As a rule, the tree is hard to grow. We have a few small trees, also 3 to 4-ft. sizes.

Prices same as Dwarf Citrus

OTHER FRUITS AND NUTS

With the exception of Guava and Loquat, these trees should be planted when dormant in December and January.

PECANS

AVOCADOS

Since Avocados do not come true from seed, we offer only the finest grafted plants in varieties that we have found hardy enough to recommend for Central Florida. Much depends upon having a good root system and a strong graft. Our best bargain, which gives real satisfaction, is our big heavy trees from nail kegs.

We learned a long time ago that Avocados must have rich soil and plenty of moisture. If you cannot supply these requirements, your efforts are wasted. Plant grafted trees in pits well prepared with ample plant food such as muck peat, dairy manure, leaf mold or other organic material. Other necessities are abundant moisture at all times, mulching and spraying with copper and other sprays as instructed in bulletins from the State Experiment Station. Our grafted trees grow very fast when properly cared for, and bear in three or four years.

Gottfried. A very vigorous tree, quite hardy. Ripens Aug., Sept.

Lula. A. Pear-shaped fruit. Light green skin; flesh pale to greenish yellow. Very productive. Ripens Dec., Jan.
Taylor. A. Small to medium size. Dark skin and light yellow flesh. Ripens Dec., Jan., Feb.

Winter Mexican. B. Oblong or broad pear-shaped fruit with dark leathery skin. Vigorous and hardy. Dec., Jan. Best-quality grafted Avocados in nail-keg sizes. 2 to 5 feet. 2 to 3 ft......\$3 50 | 4 to 5 ft.....\$6 50 to \$7 50 3 to 4 ft.......4 50 | 5-qt. cans....1 50 and 2 00

SHADE TREES FOR THE SOUTH

BAUHINIA alba. Medium size; large bilobed leaves cover the tree from spring to fall. Orchid-shaped white flowers in winter.
purpurea. Flowers sometimes 3 inches across, purple and white.
Gal
BRACHYCHITON acerifolium (Flame-tree). Panicles of scarlet flowers and deeply lobed shining leaves 10 inches across. Reaches 60 feet. 4 to 6 ft., \$10.00.

- SABAL palmetto (Cabbage Palmetto). Very hardy, with an erect trunk 20 to 40 feet high and a large head of fan-like leaves. \$2.00 per foot of clear trunk; 10 ft. \$20.00.
 - blackburniana. Very tall, with larger leaves and drooping habit. Hardy. Small sizes, \$5.00, \$7.50 and \$10.00. Large specimens, \$3.00 per ft., B&B.
- THRINAX argentea. Dwarf palm with fan-like, dark green fronds, silvery on the underside. Formal and distinctive. 4-in. pot......\$1 50 | Gal. can........\$2 50 We also have a few elegant old specimens with small trunks that make fine small patio subjects. Tropical; rare. 10 to 12 ft. Clear trunk......\$35 00 to \$50 00
- ZAMIA integrifolia. Dark green, fern-like leaves 2 feet tall. Qt. 60c

VINES

Some of the most colorful of all flowers grow on vines. These can be a never-ending source of pleasure, and the proper selection of varieties will give you year-round bloom. Keep the pruning shears handy and use them to persuade your vines to grow into thick masses that will produce myriads of flowers. Do not permit your vines to overgrow the garden and steal the space meant for other plants. The giant cabbage palms in Dupree Gardens festooned with flame-vine and buginvillaea will show you the possibilities of vines sibilities of vines.

- ALLAMANDA hendersoni (Golden Trumpet). Handsome tropical plant that may be trained as vine or shrub. Pure golden yellow flowers 4 to 5 inches across. Qt. 60c; gal. \$2.00; 5 qts. \$2.50.
- BIGNONIA speciosa. Glossy dark leaves and great clusters
 - of large, purplish, trumpet-shaped flowers. Blooms March to May. Gal. \$2.00.

 venusta (Flame-vine). Very vigorous. Orange-red, tubular flowers in dense clesters in winter. Qt. 75c and \$1.00; gal. \$2.00; 4 gals. \$3.50 to \$5.00.
- BUGINVILLAEA. Very showy. We consider this the most beautiful of all flowering vines. See pages 34 and 35 for prices and descriptions.
- **CRYPTOSTEGIA grandiflora** (Rubbery-vine). Attractive lavender flowers; dark green foliage. Qt. 75c; gal. \$2.00.
- FICUS repens (Evergreen Climbing Fig). Very vigorous vine with small, dark gray-green leaves and slender growth. 4-in. pot \$1.00; gal. can. \$2.00.
 - GLORIOSA rothschildiana. Summer-blooming bulbs. Produces lovely crimson, lily-like flowers, yellowish at base. Dies back in the winter. Valuable cut-flowers. base. Dies back in the 75c, \$1.00, and \$1.50.
 - superba. The flowers are yellow, twining red. Large and really gorgeous. 75c, \$1.00, and \$1.50.
- HONEYSUCKLE, Trumpet (Lonicera sempervirens). Tubular scarlet flowers on a broad-leaved, hardy vine. Qt. 50c; gal. \$1.50. Also white Honeysuckle.
- **SAMINE, Yellow** (Gelsemium sempervirens). Evergreen foliage and pure yellow, fragrant flowers in winter and spring. Qt. 60c; gal. \$1.50 and \$2.00. JESSAMINE,
- **PETRAEA volubilis** (Queen's Wreath). Rough evergreen leaves; exquisite purplish blue flowers in panicles. Gal. \$2.50.
- QUISQUALIS indica (Rangoon Creeper). A profusion of star-shaped flowers in bunches on a large, twining shrub of rapid growth. Blooms are white in the morning, changing to red before night; rich fragrance. Qt. 50c; gal. \$2.00.
- RHYNCHOSPERMUM jasminoides (Confederate mine). Dark evergreen leaves and fragrant, white, starshaped flowers. Hardy. Qt. 75c; gal. \$2.00; 4 gals. \$3.50.
- SENECIO confusus (Mexican Flame-vine). Dai orange-red flowers in clusters. Qt. 50c; gal. \$2.00. Daisy-like,
- SOLANUM wendlandi (Paradise Flower). Large vine with coarse leaves and elegant lilac-blue flowers. Qt. 50c; gal. \$2.00; 4 gals. \$3.50.
- TECOMA capensis (Cape Honeysuckle). Strong shrubby climber with showy orange-scarlet flowers. Qt. 35c; gal. \$1.50.
- THUNBERGIA grandiflora. Large, soft, pointed leaves and pale lavender-blue flowers. Gal. \$2.50.

Vine Collection

Pothos Nephthytis Monstera Philodendrons Beautiful tropical vines for climbing up palm tree trunks. A fine collection of the choicest sorts.

\$1.00, \$1.50, \$2.50, \$5.00 and up

DAYLILIES • Hemerocallis

These give more flowers for less effort than any plant we know of. Beginning to bloom here in late winter, they flower right on until late July. They make a beautiful fragrant mass planting, ideal for shrub borders and foundation plantings. We have a few good varieties not listed here. Come see them in bloom.

Amaryllis. Golden orange; large and handsome. $3\frac{1}{2}$ ft. 30c each.

Apricot. Clear bright yellow of fine form. 2 ft. 30c each.
Aurantiaca. Stiffly recurved flower of reddish orange. 2 ft. 30c each.

Aureole. Rich golden yellow. 3 ft. 30c each. Bagdad. Orange-red, yellow and brown; large, profuse. 3½ ft. \$1.00 each.

Bijou. Small flowers in clusters; profuse bloomer. Orang overcast fulvous red with darker midzone. 2 ft. 75c each. Cinnabar. Brownish red with cadmium-yellow throat.

free flowering. $2\frac{1}{2}$ -3 ft. 50c each.

Cressida. Reddish orange with fulvous band on each petal.

3 ft. 30c each.

Dawn. Light rose marked deeper at petal tips. 40 in. July, 30c each.

Dumortieri. Cadmium-yellow shaded orange. 1 ft. 30c each. **Emily Hume.** Orange-yellow; fluted petals. $3\frac{1}{2}$ ft. \$1.00 each.

Florham. Soft yellow; fragrant. 3 ft. 30c each.

Fulva. Rusty orange-red. Very vigorous. 2 ft. 30c each. Gypsy. Small; deep orange. 2½ ft. 30c each.

J. A. Crawford. Light yellow, deeper in throat. 4 ft. 30c each. J. R. Mann. Apricot-yellow. 3½ ft. 45c each. Lemon King. Soft yellow; recurved petals. 42 in. 30c each.

Hemerocallis Border

inda. Golden yellow flecked cinnamon; throat shaded rose. $2\frac{1}{2}$ ft. \$1.00 each.

Margaret Perry. Fulvous red; orange throat. 4 ft. 30c each. Middendorfi. Rich yellow; fragrant. 1½ ft. 30c each. Modesty. Pale lemon-yellow; cupped, fragrant blooms. 3 ft.

50c each.

Mrs. John J. Tigert. Brazil-red, yellow base. \$1.50 each.
Ophir. Golden yellow; fragrant. 30c each.
Orangeman. Deep orange; very large. 3 ft. 30c each.
Sir Michael Foster. Clear yellow; fragrant, funnel-shape

flowers. 4 ft. 30c each.

Sovereign. Lemon color. 2½ ft. 30c each.

Thunbergi. Buttercup-yellow; fragrant. 3 ft. 30c each.

Viscountess Byng. Yellow flushed apricot. 30c each.

NOTE—prices are for small divisions and sizes indicate the height the different varieties grow. Also we can supply clumps at a higher price.

Loading 15 cubic yards of composted planting soil in five minutes is possible with the dragline. To load by hand would require two hours, with three men working steadily. The specially made, 16-foot, all-steel dump truck cost \$6000, yet it represents a saving in the long run. We have a big stock pile of finished compost of approximately 4000 cubic yards.

COMPOSTED PEAT

Many people fail to realize the importance of planting in the proper soil. In most cases, success or failure is determined at planting time. That is why we urge the use of the right compost, for organic materials such as manure, leaf mold, muck, and peat are the essential elements that keep a soil in tune and able to keep on producing. All growing things need food; without it, plants cannot reach their maximum development. When you get off to a good start, gardening is a joy. The problem is to supply each plant with the elements it prefers; success will then be easy.

For over fifteen years we have studied and worked to improve our soils and composts. Good compost is not easy to make; as with other good things, plenty of hard work is needed to create the finished product, Constant watching and working go into the making of good compost, as well as manpower and expensive equipment. It takes determination in sticking to the job and being on hand to maintain the correct moisture, drainage, and heat. Turning the material at the proper time is a tiresome detail but a very necessary one for good results. These are all important considerations.

We offer planting soils for all sorts of gardening. We have the raw materials, the stock piles, and equipment to enable us to offer it in bushel lots, cubic yards, truck loads, semitrailer and carload lots. In planting North Boulevard Homes in Tampa we used approximately 40,000 cubic yards of peat and various composts. This job required six months' time, with over three weeks in trucking alone from pit to project. Approximately \$20,000 worth of equipment was used in making and hauling this material—and this was only one project of ours.

We now have five big piles of from 1000 to 2000 cubic yards each, of compost in the making. We turn these piles twice a year with a dragline. We sell several thousand bushels of compost, oftentimes in bushel lots, and many of our customers get a real bargain by doing their own hauling. In this way, five bushels may be had for the price of four—you get one free when you serve yourself and take your choice. Other customers come with trailers, some with trucks, and do their own loading and hauling. Thus they save from 25 to 33 per cent depending on the compost selected. We welcome this kind of trade and make every effort to please you.

High-grade Composted Peat is the best planting compost for azaleas, camellias, citrus fruit, shrubs, palms and other trees. Dig out the planting area and mix the peat compost thoroughly with the best topsoil. Place the plant at the proper depth, refill the hole and water well.

High-grade Composted Peat, \$4.00 per cu. yd. delivered; 50c per bus. Extra-grade, \$5.00 per cu. yd. delivered.

BIG TREES

Why spend the best part of your life waiting for a tree to grow to enjoyable size? We can save you many years by supply-

ing big trees.

For many years the moving of big oaks, grafted magnolias, flowering trees, jacarandas, and palms has been a major part of our business. Our equipment plus our knowledge and experience are at your disposal. Call and make your own selection, and let us do the rest.

FOR SEASIDE PLANTING

Chalcas Allamanda Lantana Australian Pine Elæagnus Ligustrum Bottle Brush Gardenia Oleander Buginvillæa Hibiscus Pittosporum Raphiolepis Carissa Juniperus Ĭxora Cajaput Severinia

TERMS OF BUSINESS

- LOCATION. Our office and nurseries are located on U.S. Highway 41, six miles north of Sulphur Springs on North Nebraska Ave., ½ mile south of Apex. Mailing address: Jack O. Holmes, Inc., P.O. Box 417, Tampa 1, Fla. Phone: 332261.
- CASH or half cash must accompany all orders for immediate delivery or shipment. On reserve orders booked in advance of the shipping season, 25 per cent down will be required, with the balance due when the shipping season opens. Reserve orders are accepted only upon condition that they shall be void should injury befall the stock before shipment from any causes not under our control. Stock retained at our nurseries long enough to grow to a larger grade will be billed accordingly at shipping time. All labor costs are based on normal digging. There will be an additional charge when objects are encountered which entail extra labor, such as rocks and stumps.
 - SHIPMENTS. State clearly when ordering how you prefer shipment made—by Express, Freight, Truckline, or Parcel Post. Most of our small shipments go by Express. If you omit instructions, we will use our best judgment. Be sure to add 20 per cent to all orders to cover packing charges. The transportation charge will be collect on delivery; Parcel Post charges bill additional.
- SHIPPING SEASON. Bare-root plants are shipped from November to February, pot-grown plants at any time. Balled and Burlapped plants are available except in July, August, and September. We will not make substitutions unless you instruct us to do so.
- **DELIVERY** by our trucks outside of suburban Tampa: orders for plants over \$25.00, 15c per mile, round-trip basis.

1

- PLANTING TIME. Citrus trees for home planting, bare root and B&B, are easily moved beginning in October and through November, December, January, and February. For the past two warm seasons citrus trees have put out heavy new growth and bloomed in February which made it hard for the trees to get reestablished. Plant early for best results. Roses are best planted in December and January; bare-root, dormant fruit trees and deciduous plants in November, December, and January (December and January are best); camellias and azaleas preferably from October to February; big trees, oaks and magnolias in December and January. Potted and tub-grown plants can be moved at any time of the year.
- OUR GUARANTEE. We guarantee everything we sell to be true to name, properly rooted, well grown, properly packed, and shipped according to instruction. liability under the foregoing guarantee is limited in amount to the original price received. We sell no nursery stock under a guarantee to live, except potted and balled plants. These we agree to replace at not less than 50 per cent of the purchase price during the following planting season, should any die from causes other than complete neglect. 90-DAY LIMIT ON GUARANTEES. WE DO NOT GUARANTEE ANY BARE-ROOT PLANTS OR TREES. ALL ARE PRICED ACCORDINGLY. **INGLY**
- CLAIMS. If any errors should occur, they will be promptly rectified, provided claims are made within ten days after receiving the goods. Our responsibility, except as stated above, ceases upon delivery of nursery stock in good condition to the public carrier.
